Title : Teleconferencing Robot With Swiveling Video Monitor

CLEAN COPY OF AMENDED CLAIM

- sub C1)
B2
1. A teleconferencing robot, for enabling a remote conferee to project a sense of presence into a group meeting, the teleconferencing robot comprising:
- a base;
 - a video monitor movably mounted to the base for receiving and displaying an image of the remote conferee;
 - a video camera movably mounted on the base;
 - control means mounted on the base for moving the video monitor and video camera in response to an input control signal; and
 - wherein said video monitor and video camera move in response to said input control signal to enable the remote conferee to project a sense of presence into the group meeting.
